International Journal of
Quantum Chemistry

Contents for Volume 74, 1999

Issue No. 1, 1999

Theoretical and Computational Developments

The Antiparallel Electron Correlation Coefficient and Coulomb Hole Structure
W.-X. Xu **1**

Algebraic Solutions for the Octahedral Group: Group Chain $O \supset C_4$
P.-D. Fan and J.-Q. Chen **7**

Linear Expansions of Correlated Functions: Variational Monte Carlo Case Study
L. Bertini, D. Bressanini, M. Mella, and G. Morosi **23**

Performance of the Elongation Method with Larger Basis Sets
G. Räther, Y. Aoki, and A. Imamura **35**

Numerical Integration of the Kohn–Sham Equations: Integral Method for Bound States
M. Roche **49**

Relations Between DFT and CI Approximation
L. Künne **55**

Properties, Dynamics, and Electronic Structure of Atoms and Molecules

Theoretical Modeling of the Symmetric (C_{2v}) Electrophilic Attachment of Chlorine to Ethylene in Aqueous Solution
C. Amovilli, F. M. Floris, and B. Mennucci **59**

Issue No. 2, 1999

Quantum Theory of Chemical Bonding:
Special Issue in Memory of Joseph Gerratt

Guest Editors:
S. Wilson, M. Raimondi, and D. L. Cooper

J. Gerratt **69**

J. Gerratt, 1938–1997
S. Wilson, M. Raimondi, and D. L. Cooper **71**

Scientific Publications of J. Gerratt **77**

Theoretical and Computational Developments

Spin-Coupled Wave Functions for Atoms and Molecules
J. Gerratt and W. N. Lipscomb **83**

An Ab Initio Form of Classical Valence-Bond Theory
R. McWeeny **87**

State-Selective Core-Optimized Spin-Coupled Theory
S. J. McNicholas and F. R. Manby **97**

A $\Sigma^{+} \leftrightarrow \Sigma^{-}$ Selection Rule for the Collisions of Some Atomic Ions with Diatomic Molecules
D. E. Parry **103**

The Born–Oppenheimer Correction Terms for a Triatomic System in the Sutcliffe–Tennyson Formulation
B. T. Sutcliffe **109**

SGA Derivation of Matrix Elements Between Spin-Adapted Perturbative Wave Functions
J. Meller and W. Duch **123**

On the Application of Hierarchical Orthogonality Restrictions to Spin-Coupled Wave Functions
S. Wilson **135**

A New Procedure to Optimize Core Orbitals in the Spin-Coupled Wave Function
M. Sironi **145**

Bound States in Screened and Bare Coulomb Potentials: A Nonorthogonal CI-Based Route to Effective Hamiltonians for Two-Electron Systems
P. Chaudhury and S. P. Bhattacharyya **153**

Many-Electron Theory: Density Functional Approach Generalized to Treat Spin Eigenfunctions and Relation to Spinless Low-Order Density Matrices
N. H. March **163**

Properties, Dynamics, and Electronic Structure of Atoms and Molecules

Size Dependence of the $X^1A_g \rightarrow 1^1B_u$ Excitation Energy in Linear Polyenes
X. Li and J. Paldus **177**

Spatial Structures and Electronic Excited States of Small Protonated Helium Clusters
I. Baccarelli, F. A. Gianturco, and F. Schneider **193**

Aromaticity of Bent Benzene Rings: A VBSCF Study
F. Dijkstra and J. H. van Lenthe **213**

Bent-Bond versus Separated-Bond Models: A Spin-Coupled Survey for a Few Organic and Inorganic Systems
F. Ogliaro, D. L. Cooper, and P. B. Karadakov **223**

A Spin-Coupled Investigation of the Electrophilic Addition of Hydrochloric Acid to Ethylene
T. Thorsteinsson, A. Famulari, and M. Raimondi **231**

Properties, Dynamics, and Electronic Structure of Condensed Systems and Clusters

Nature of Binding in Small Metal Clusters
I. G. Kaplan **241**

Molecular Structure, Dynamics, and Function of Biological Systems

Rotational Barriers of Amides and Polyisocyanates: A Spin-Coupled Study
G. Raos, P. Bielli, and E. Tornaghi **249**

Spin-Coupled Study of Hydrogen-Bonded Systems: The Nucleic Acid Pairs
M. Raimondi, A. Famulari, and E. Gianinetti **259**

Issue No. 3, 1999

Biophysics Quarterly

Charge Distributions and Molecular Electrostatic Potentials Around Amino Acids: Usefulness of Hybridization Displacement Charge
P. S. Kushwaha, A. Kumar, and P. C. Mishra **271**

Modeling Vibrational Spectra of Amino Acid Side Chains in Proteins: Effects of Chloride and Bromide Counterions on Ethylguanidino Vibrational Frequencies
C. Trindle, M. Braiman, and A. B. Prager **291**

Modeling Enzyme–Inhibitor Interactions in Serine Proteases
M. J. Ramos, A. Melo, E. S. Henriques, J. A. N. F. Gomes, N. Reuter, B. Maigret, W. B. Floriano, and M. A. C. Nascimento **299**

Theoretical Studies on the Possible Reaction Pathway for the Deacylation of the AChE-Catalyzed Reaction
Q. M. Wang, H. L. Jiang, K. X. Chen, R. Y. Ji, and Y.-J. Ye **315**

AM1 Study of Proton-Transfer Reactions of Barbituric Acid
R. Kakkar and V. Katoch **327**

Thermolysis Mechanism of *N*-Acetylpropanamide
S.-W. Zhang and F.-C. He **337**

Biologically Active Fullerene Derivatives: Computations of Structures, Energetics, and Vibrations of $C_{60}(OH)_x$ and $C_{60}(NO_2)_y$
Z. Slanina, X. Zhao, L. Y. Chiang, and E. Osawa **343**

Use of the HSAB Principle in Quantitative Structure–Activity Relationships in Toxicological Research: Application to the Genotoxicity of Chlorinated Hydrocarbons
A. Baeten, M. Tafazoli, M. Kirsch-Volders, and P. Geerlings **351**

Transport of Excitation Energy in a Three-Dimensional Doped Molecular Aggregate. VII. Physical Chemistry of Exciton Processes in Thylakoid Membrane
S. N. Datta and D. Shah **357**

Evidence for Dimerization in the β_2-Adrenergic Receptor from the Evolutionary Trace Method
G. V. Gkoutos, C. Higgs, R. P. Bywater, P. R. Gouldson, and C. A. Reynolds **371**

Issue No. 4, 1999

Theoretical and Computational Developments

Influence of the Polar Medium Fluctuation on the Nonradiative Electron Transfer in Molecules
A. V. Belousov, V. A. Kovarsky, and B. S. Yastrebov **381**

Properties, Dynamics, and Electronic Structure of Atoms and Molecules

Basicity and Solvent Effects on Hydrogen Bonding in $NR_3 \cdots HCOOH$ (R = H, CH_3) Model Systems
P. Pérez, G. Zapata-Torres, J. Parra-Mouchet, and R. Contreras **387**

Theoretical Study of Salicylaldehyde Conformal Isomers and Their Intramolecular Oxygen and Hydrogen Relations
C. Chen, S.-F. Shyu, and F.-S. Hsu **395**

Relativistic Effects on Geometry and Electronic Structure of Small Pd_n Species ($n = 1, 2, 4$)
C. Xiao, S. Krüger, T. Belling, M. Mayer, and N. Rösch **405**

Pseudospectral Calculation of the Gas-Phase Acidities of Aliphatic Alcohols
C. O. da Silva, E. C. da Silva, and M. A. Chaer Nascimento **417**

Properties, Dynamics, and Electronic Structure of Condensed Systems and Clusters

Reaction Model for Methane Oxidation on Reduced SnO_2 (110) Surface
Y. Yamaguchi, Y. Nagasawa, S. Shimomura, and K. Tabata **423**

Erratum

Molecular Shape, Shape of the Geometrically Active Atomic States, and Hybridization
Y. Komninos and C. A. Nicolaides **435**

Issue No. 5, 1999

The Role of Mathematics in Quantum Chemistry: Special Issue in Honor of George G. Hall (Part I of II)
Guest Editors: Don Rees and Hiroshi Fujimoto

George G. Hall **437**

Recollections and Reflections
G. G. Hall **439**

Theoretical and Computational Developments

Explicitly Correlated Extracule Densities for Two-Electron Atoms
T. Koga and H. Matsuyama **455**

On the Independence of Correlated Events
R. D. Levine **467**

Quantum Defect and Transition Probabilities
I. Martin **479**

A Simple Rule to Find Nondisjoint NBMO Degenerate Systems for Designing High-Spin Organic Molecules
Y. Aoki and A. Imamura **491**

A Fuzzy-Set Approach to Functional-Group Comparisons Based on an Asymmetric Similarity Measure
G. M. Maggiora and P. G. Mezey **503**

Simple SCF Method with Spin-Orbit Interaction: SOSCF Method
O. Takahashi, K. Saito, and S. Yabushita **515**

Charged Particles, Gauge Invariance, and Molecular Electrodynamics
R. G. Woolley **531**

Distributed Gaussian Basis Sets: A Stochastic Variational Approach for Diatomic Molecules
S. Wilson **547**

Some Recent Mathematical Contributions to Quantum Chemistry
E. Cances, M. Defranceschi, and C. Le Bris **553**

Approximate Analytical Solutions for Two-State Time-Dependent Problems
B. L. Burrows, F. M. Moideen, and A. T. Amos **559**

Locality and Nonlocality in Quantum Mechanics: A Two-Proton EPR Experiment
R. McWeeny and C. Amovilli **573**

A Note on Current Flow in Donor–Bridge–Acceptor Systems
A. T. Amos and B. L. Burrows **585**

Some Properties of Reduced Density Operators
R. L. Hudson **595**

Issue No. 6, 1999

The Role of Mathematics in Quantum Chemistry: Special Issue in Honor of George G. Hall (Part II of II)

Guest Editors: Don Rees and Hiroshi Fujimoto

Theoretical and Computational Developments

A Theory of Special Points in Two-Dimensional Solid-State Calculations
G. G. Hall and D. Rees **601**

D-Wave Condensate and Essential Phenomenological Description of Some Properties of High T_c Cuprate Superconductors
L. J. Dunne, E. J. Brändas, and J. N. Murrell **617**

On the Hall Rule in the Theory of Benzenoid Hydrocarbons
I. Gutman **627**

Structural Analysis of Certain Linear Operators Representing Chemical Network Systems via the Existence and Uniqueness Theorems of Spectral Resolution. V
S. Arimoto, K. Fukui, P. Zizler, K. F. Taylor, and P. G. Mezey **633**

Corrections to the Born–Oppenheimer Approximation as Applied to a System Made Up of Hydrogen and Antihydrogen
E. A. G. Armour and V. Zeman **645**

Characteristics of Numerical Realization via Stochastic Partial Differential Equation: An Application to Density Matrix Calculation
Y. Saito and M. Nagaoka **653**

CSF-Based Multireference Coupled-Pair Approximation. IV. Revision of Coupling Term and Application to Rydberg–Valence Avoided Crossing in Lowest Two $^1\Sigma^+$ Excited States of FH Molecule and Lowest Two $^3\Pi_g$ States of F_2 Molecule
K. Tanaka, T. K. Ghosh, and T. Sakai **661**

Properties, Dynamics, and Electronic Structure of Atoms and Molecules

Application of the Regional Density Functional Theory: The Chemical Potential Inequality in the HeH^+ System
A. Tachibana, K. Nakamura, K. Sakata, and T. Morisaki **669**

Dipole Moment Surfaces and Spectroscopic Calculations
B. T. Sutcliffe **681**

Resonance Energy of Giant Benzenoid Hydrocarbon $C_{78}H_{26}$
M. Randić and X. Guo **697**

Monte Carlo Simulations of Water Clusters on a Parallel Computer Using an Ab Initio Potential
E. V. Akhmatskaya, M. D. Cooper, N. A. Burton, A. J. Masters, and I. H. Hillier **709**

Analysis of π-Electronic Structures of Small Alternant Hydrocarbons to Infinitely Large Polymeric Strips: The Aufbau Principle and End-Group Effects
J. R. Dias **721**

Quantum Theory in Organic Chemistry: Electronic Structure and Chemical Reactivity of (π-Allyl) palladium Complexes
H. Fujimoto and T. Suzuki **735**

Broken-Symmetry Orbitals for the Quasidiabatic Electronic States of Polymers
H. Nobutoki **745**

Kinetic Stability of C_{78} Fullerene Isomers as Revealed by the Bond Resonance Energy Method
J. Aihara and A. Sakurai **753**

Ab Initio Through Space/Bond Interaction Analysis on the Stereoelectronic Effect by Modifying the Exponents of the Basis Set
A. Imamura, H. Sugiyama, Y. Orimoto, and Y. Aoki **761**
